

**Business name**

DMTagging

Short description of what you do

DMTagging provides professional audio metadata tagging services that ensure music files are correctly identified, credited, and ready for radio, playlists, broadcasters, and digital platforms.

List of services you offer

- Audio file metadata tagging (WAV, MP3, AIFF, FLAC)
- ID3 tagging & broadcast-ready formatting
- ISRC embedding
- Artist, title, album, genre, year & label tagging
- Composer & songwriter metadata
- Copyright & ownership metadata
- Contact and promotional metadata for radio
- File naming & delivery optimisation
- Metadata audits and corrections for existing catalogues

Who your ideal clients are

- Independent artists and bands
- Music managers and labels
- Radio-servicing companies
- Producers and studios
- Sync libraries and content creators
- Anyone submitting music to radio, playlists, or curators

Your process from start to finish

1. Client submits audio files and required information
2. DMTagging reviews files for format and compliance
3. Metadata is professionally embedded to industry standards
4. Files are quality-checked for accuracy and compatibility
5. Finished files are delivered ready for radio and distribution

Fast, simple, no back-and-forth.

What clients receive as deliverables

- Fully tagged, broadcast-ready audio files
- Consistent, clean metadata across all tracks
- Correct attribution for artists, writers, and copyright holders
- Files compatible with radio automation and digital platforms
- Peace of mind that nothing is missed

Pricing structure or package deals

- **Single Track Tagging** – per-track rate
- **EP / Single Bundle** – discounted multi-track package
- **Album / Catalogue Tagging** – bulk pricing available
- **Label / Ongoing Service** – custom retainer options

(Exact pricing available on enquiry)
